

Warning Label Database™

Assists Caregivers with Clear, Concise Electronic Labeling

PROVIDES CAREGIVER INSTRUCTIONS

The text provided by Warning Label Database™ can be made available on the Medication Administration Record (MAR) to assist nurses. In easy-to-understand language, these labels remind patients and caregivers of essential instructions and warnings associated with the use of a

given medication. Warning Label Database™ automates the auxiliary labeling process by providing clear, concise label text that can be printed onto adhesive labels for application on a prescription vial or container as part of the label generation process.

MEETS HEALTH CARE PROVIDERS' NEEDS

- **Delivers** accurate, professionally prioritized information
- **Assists** in educating patients and caregivers on:
 - Cautions and warnings
 - Proper drug administration and preparation
 - Important food and OTC medication interactions
 - Proper storage and disposal instructions

Warning Label Database™

INCLUDES:

- Up to five clinically appropriate warning labels per drug
- Text available in English, Spanish and Canadian-French languages
- An electronic cross-reference to widely distributed preprinted auxiliary label systems and font sources, including:
 - Pharmex®
 - Samuels
 - Intercon®
 - Architext®
 - Printed Solutions

BENEFITS

- *Reduces the risk of administration errors*
- *Saves time, money and storage space required to stock and use preprinted auxiliary labels within the pharmacy*
- *Eliminates communication barriers*
- *Increases efficiency by generating warning labels within the pharmacy dispensing workflow*
