

Integrated A to Z Drug Facts™ Module

Delivers Quick Answers to Drug Questions

SIMPLIFIES DRUG INFORMATION RESEARCH

Integrated A to Z Drug Facts™ Module provides payers with concise drug reference information in an easy-to-access format. Integrated A to Z Drug Facts™ Module places drug monographs, drug therapy protocols and patient counseling information on prescription and OTC medications encountered in health care settings at your fingertips.

MEETS PAYERS' NEEDS

- **Provides** seamless access to critical drug reference information, including dosing, drug interactions, adverse reactions, warnings and precautions
- **Embeds** trusted Facts & Comparisons™ content directly within the workflow application
- **Provides** drug reference information to support formulary decision-making and patient call centers

Integrated A to Z Drug Facts™ Module

INCLUDES:

- Administration and dosage information organized by patient age, route and specific disease state or medical condition
- Prescription, OTC and Canadian medications
- Indications for labeled, unlabeled and orphan uses
- Adverse reactions organized by body system
- Warnings and precautions for children, pregnant and lactating women, and the elderly, as well as for specific disease states
- Drug interactions
- Black box warnings
- Patient counseling information
- Monographs linked to Medi-Span's Generic Product Identifier (GPI)
- XML based monographs and accompanying style sheet to transform the content into HTML or other documents

BENEFITS

- *Improves efficiency by including only the most relevant drug information*
- *Empowers quick decision-making by eliminating the need to search through volumes of data*
- *Improves efficiency by providing drug reference information within the workflow*
