

# Integrated A to Z Drug Facts™ Module

Delivers Quick Answers to Drug Questions

## REDUCES PRESCRIPTION ERRORS

Integrated A to Z Drug Facts™ Module provides pharmacists with concise drug reference information in an easy-to-access format. Comprehensive drug monographs, drug therapy protocols and patient counseling information are provided on prescription and OTC medications encountered in ambulatory care and acute care settings. When embedded into workflow applications, Integrated A to Z Drug Facts™ Module puts up-to-date drug information at your fingertips.

## MEETS PHARMACISTS' NEEDS

- **Provides** seamless access to critical drug reference information, including dosing, drug interactions, adverse reactions, warnings and precautions
- **Supplies** patient education section to assist in patient counseling
- **Embeds** trusted Facts & Comparisons™ content directly within the workflow application
- **Presents** information concisely in an easy-to-read format suitable for popular hand-held devices or traditional desktop and laptop applications

# Integrated A to Z Drug Facts™ Module

## INCLUDES:

- Administration and dosage information organized by patient age, route and specific disease state or medical condition
- Prescription, OTC and Canadian medications
- Indications for labeled, unlabeled and orphan uses
- Adverse reactions organized by body system
- Warnings and precautions for children, pregnant and lactating women, and the elderly, as well as for specific disease states
- Drug interactions
- Black box warnings
- Patient counseling information
- Monographs linked to Medi-Span's Generic Product Identifier (GPI)
- XML based monographs and accompanying style sheet to transform the content into HTML or other documents

## BENEFITS

- *Saves time by eliminating the need to exit the workflow to access drug reference information*
- *Reduces risk of dispensing errors by placing reference information within the workflow*
- *Increases patient safety by facilitating patient counseling*
