

Medi-Span®

# Medi-Span® Electronic Drug File™ (MED-File) v2

Delivers Comprehensive Drug Information

## DELIVERS TIMELY DRUG DESCRIPTIVE AND PRICING DATA

When you reimburse for prescription drug products, you need ready access to the latest drug information and pricing. MED-File v2 provides pricing and descriptive information on name brand, generic, prescription and OTC medications, including herbals. As a comprehensive drug file, MED-File v2 provides HMOs, insurance companies, claims managers and pharmacy benefit managers with the information they need for payment and analysis.

## MEETS PAYERS' NEEDS

- Supports formulary development, management, and claims adjustment
- Assists in medication profiling and disease management
- Supports Drug Utilization Reviews (DUR)
- Facilitates retrospective analysis

## BENEFITS:

- Simplifies the process of generic product substitutions
- Increases efficiency by providing access to automated, current pricing information
- Provides a single source that accesses Medi-Span's trusted clinical content
- Increases margins by providing multiple methods for determining drug reimbursement

**INCLUDES:**

- Industry standard identifiers for brand and generic drugs including National Drug Code (NDC), Universal Product Code (UPC) and Health Related Item (HRI) values
- Proprietary drug identifiers including Generic Product Identifier (GPI), Therapeutic Classification System (TCS), Generic Product Packaging Code (GPPC) and Drug Descriptor Identifier (DDID)
- Pricing files:
  - Average Wholesale Price (AWP)
  - Wholesale Acquisition Cost (WAC)
  - Direct Price (DP)
  - Centers for Medicare and Medicaid Services, Federal Upper Limit (CMS FUL)
  - Average Average Wholesale Price (AAWP)
  - Generic Equivalent Average Price (GEAP)
- Ingredients (Optional)
- Names of manufacturers, distributors, and labelers, as well as packaging information
- Links from old to new National Drug Codes (NDC)
- Up to 48 months of inactive products
